## Thirty Years of Impeccable Work

Are you suffering from poor air quality or allergens in your living environment? Do you have a calamity of jumbled belongings in a once useful space? Are your windows dirty? Let me help you deal with these areas and others.

With my many years of providing a bridge between chaos and order, I have developed many useful skills.

### Air Purification

Many people suffer needlessly from toxins they do not even realize are in their environment. Pet odor, accidents, hair and dander; mold, dust and dust mites; off-gassing from new carpets, furniture and from cleaning agents; cooking odors, fireplace and cigarette smoke.

The air purifiers I offer contain several systems, one of which, the Space Certified, Active Pure system, was used on the Space Shuttle. These systems work together to clean the air. In addi-

tion, they even sanitize surfaces by substantially reducing microbial populations. You do not have to wait till *your* air passes through the machine, they replicate the cleaning processes of nature by putting out a plasma that goes to the source of the problem. One machine can handle up to 3000 sq ft of area.

If you are interested, I will let you try one for a week without charge, to see if it will help you.

### Window Cleaning

I'm a master window cleaner with 30 years of expertise. Customers are often amazed at the results I achieve. It is said that no one gets them as clear as I do and that the windows stay clean longer. I clean the windows and storms, wipe the sills and can remove oxidation and paint and do the screens if desired. Heights and windows that are hard to reach or figure out, are not a problem. I've seen almost everything in regards to windows over the last 30 years.

If you consider the effort you would need to expend and the dangers you'd need to confront, isn't it worth it to have someone capable and experienced do an outstanding job on them rather than risk it yourself?

Your fine home will glisten like a polished gem. Think of the light that will shine in and the view when you look out.

### Professional Organizing

Many of us have rooms, basements, closets, garages, etcetera we'd love to use, or at least know what's in them. Let me help organize and clean these spaces for you, then set them up so that they are attractive, welcoming places for you to use, where you can find anything you want when you need it, and have a convenient logical place to keep things when you want to put something away. For instance, do you have a room you can't even walk into?

How would you feel if it looked like this?

Once your space is put in order, it could then be used for an office, craft workshop, home for a family member who's moving back, or a storage space that's shipshape, where you know what's there and can find it when you want to. After that we can develop a plan, together, to easily keep it that way.
